

Alexandros Polyzoidis

Nationality: Greek **Date of birth:** 07/09/1992 **Place of birth:** Thessaloniki, Greece

✉ **Email address:** alexandros.polyzoidis@satorianalytics.com

📍 **Home:** Kerkyras 19, 55133 Thessaloniki (Greece)

ABOUT ME

AI Engineer with an MSc in Data Science and Machine Learning and a background spanning machine learning, generative AI, and production software delivery. I design and build end-to-end Retrieval-Augmented Generation and document intelligence systems, covering data ingestion, knowledge retrieval, response generation, evaluation, and observability, and deliver them as containerised services integrated into client applications. I have delivered AI solutions in the banking, energy and utilities, and public sector domains, and earlier machine learning and computer vision work in logistics and e-commerce. I hold Microsoft Azure certifications in AI Engineering, Data Science, and Administration.

WORK EXPERIENCE

🏢 **Satori Analytics** – Thessaloniki (remote), Greece

AI Engineer

[01/10/2025 – Current]

TASKS & RESPONSIBILITIES

- Design and build end-to-end Generative AI and Retrieval-Augmented Generation (RAG) systems, from document ingestion through knowledge retrieval to response generation.
- Develop document intelligence pipelines combining OCR, deterministic parsing, and LLM-based agents to extract and analyse structured information from unstructured business documents.
- Build automated data ingestion workflows against enterprise content sources, including SharePoint connectors and web crawling with incremental (delta) crawling to keep indexes current.
- Implement PDF processing and document-parsing components that identify tables and structured financial content within long-form corporate documents.
- Implement hybrid retrieval (keyword combined with vector search) to improve answer relevance and groundedness over large document collections.
- Design and run evaluation workflows measuring retrieval and response quality, and build observability into AI pipelines to monitor behaviour in operation.
- Develop agentic AI components that orchestrate multi-step reasoning and tool use over enterprise data.
- Integrate speech processing and real-time conversational interfaces, including a live avatar interaction layer, into an end-to-end RAG workflow.
- Containerise and expose AI services as APIs for integration into client-facing applications.

INDICATIVE PROJECTS

- Banking sector, automated financial document analysis: designed AI pipelines for automated extraction and analysis of financial data from corporate business plans and financial statements; built a document intelligence workflow combining OCR, deterministic parsing, and LLM-based agents to identify financial tables, funding structures, and investment assumptions.
- Energy & Utilities sector, enterprise RAG assistant: developed a RAG assistant giving staff natural-language access to technical and operational documentation; built the automated SharePoint and web ingestion, incremental crawling, PDF processing, hybrid retrieval, evaluation, and observability workflows.
- Public Sector & Legal, conversational AI avatar: developed a conversational AI avatar for real-time user support, building an end-to-end RAG workflow combining knowledge retrieval, natural-language response generation, speech processing, and live avatar interaction.

TECHNOLOGIES USED

Python | Generative AI | Retrieval-Augmented Generation (RAG) | Agentic AI | Large Language Models (LLMs) | Azure AI Search | Hybrid retrieval | OCR | Document intelligence | PDF processing | SharePoint ingestion | Web crawling / incremental crawling | LLM evaluation | Observability | Speech processing | Conversational AI | FastAPI | Docker | Machine Learning | MLOps

 **Self-employed** – Greece

Freelance Data Scientist / Machine Learning Engineer

[01/10/2023 – 01/10/2025]

TASKS & RESPONSIBILITIES

- Delivered end-to-end machine learning solutions for e-commerce and logistics clients, covering customer segmentation, sentiment analysis, and image classification.
- Built and deployed deep learning computer vision models for automated detection of damaged loads and packages in warehouse operations.
- Developed and deployed production-ready ML services as containerised REST APIs.
- Applied experiment tracking and data/model versioning to make training runs reproducible.
- Built data visualisation dashboards turning model output into operational decision support.
- Implemented modular, maintainable ML pipelines following SOLID design principles and CI/CD workflows.

INDICATIVE PROJECTS

- Logistics & Operations, damaged-package detection: developed a deep learning image classifier to detect damaged packages in warehouses using TensorFlow and MLflow; containerised the solution with FastAPI for real-time testing and performance evaluation.
- Retail / E-commerce, customer segmentation: built customer segmentation models to support commercial targeting and operational decision-making.

TECHNOLOGIES USED

Python | TensorFlow | Computer Vision (CNNs) | Natural Language Processing | FastAPI | Docker | MLflow | DVC | Power BI | Tableau

 **Cyclopt** – Thessaloniki, Greece

SaaS B2B Sales & Strategy Analyst, Revenue Dpt

[01/01/2022 – 01/05/2024]

TASKS & RESPONSIBILITIES

- Applied unsupervised machine learning (K-means clustering) to segment B2B buyer personas and inform commercial strategy.
- Built and maintained data visualisation dashboards in Power BI and Tableau analysing lead quality, conversion rates, and pipeline performance.
- Translated analytical findings into actionable strategy with cross-functional commercial and technical teams.
- Managed pipeline data and forecasting in a CRM system; prepared quotes, proposals, and contracts.
- Ran customer onboarding through to activation.

INDICATIVE PROJECTS

- B2B customer segmentation for revenue strategy: applied unsupervised clustering to the customer base to define buyer personas used to target commercial effort.
- Commercial analytics dashboards: designed Power BI and Tableau reporting on lead quality and conversion for the revenue function.

TECHNOLOGIES USED

Python | Machine Learning (K-means / unsupervised clustering) | Customer segmentation | Power BI | Tableau | Odoo CRM | Data analysis

 **Softweb Adaptive I.T. Solutions** – Thessaloniki, Greece

Account Manager, Sales Department

[01/05/2021 – 01/01/2022]

 **Upwork**

Freelance Logistics Consultant

[01/09/2019 – 01/04/2021]

 **Makios Logistics S.A.** – Thessaloniki, Greece

Logistics Manager, Packed Goods Transport Department

[01/04/2018 – 01/08/2019]

 **Hellenic Air Force**

Military Service, IT Department

[01/03/2017 – 01/03/2018]

 **Hellenic-German Chamber of Commerce and Industry** – Thessaloniki, Greece

Intern

[01/11/2014 – 01/03/2015]

SKILLS

Artificial Intelligence & Machine Learning

Artificial intelligence / Machine learning / Generative AI / Deep learning / Retrieval-Augmented Generation (RAG) / Computer vision / Large Language Models (LLMs) / Natural language processing / Optical character recognition (OCR)

Cloud & MLOps

Microsoft Azure / Docker / MLflow / MLOps

Programming & Frameworks

Python / SQL / TensorFlow / PyTorch / Pydantic AI / scikit-learn / Hugging Face Transformers / FastAPI

Data & Visualisation

Power BI / Tableau

EDUCATION AND TRAINING

MSc in Data Science and Machine Learning

Hellenic Open University [01/09/2023 – 01/06/2025]

City: Patras | Country: Greece | Level in EQF: EQF level 7

MSc in Logistics and Supply Chain Management

Aristotle University of Thessaloniki [01/09/2015 – 01/03/2017]

City: Thessaloniki | Country: Greece | Level in EQF: EQF level 7

BSc in Economics

Aristotle University of Thessaloniki [01/10/2010 – 01/03/2015]

City: Thessaloniki | Country: Greece | Level in EQF: EQF level 6
